EDUCATION

Bsc. computer Science informatics Institute of Technology affiliated with University Of Westminster
2024 - present

IJSE –Institute of Software Engineering

Advance Level
BD/Uva Science College
2022

EXPERTISE

Python

MySql

JAVA

HTML/CSS/Javascript

LANGUAGE

English

Sihala

ABOUT ME

I'm currently a student in my undergraduate studies and I'm looking for an internship to apply the knowledge and practical skills I've gained. I'm a self-driven, adaptable, and conscientious individual who is enthusiastic about expanding my knowledge of different technologies and providing top-notch service to the company. My objective for this internship is to improve my abilities and add value to the team.

PROJECTS

Finance Tracker

It helps users manage their finances by tracking incomes and expenses. The app has a secure login system, an interface for recording transactions, and financial summaries and reports. This project showcases my skills in Python programming and GUI development, demonstrating my ability to create practical and user-friendly software.

Student Management System

Developed a Java-based Student Management System with features such as checking available seats, student registration and deletion, accessing student details, storing and loading student information from a file, viewing student lists, and retrieving module marks. This system simplifies student management and improves data accessibility and organization.

Research on Machine Learning

I conducted an in-depth research project on different machine learning techniques, delving into their various types, applications, as well as their pros and cons. This helped me gain a thorough understanding of their potential impact and relevance in real-world situations.

web site

Created a website focused on "Life on Land" using HTML, CSS, and JavaScript. The site features engaging content and interactive elements to highlight various aspects of terrestrial ecosystems, showcasing information through a well-designed layout and dynamic user interface.
